

W119.10 Hot Soluble Bag shopping bag

Wow! A shopping bag that dissolves in water. The bag is made of Polyvinyl, also called PVA. PVA can dissolve easily in water and is biodegradable. In hot water even within a few seconds. The bag disappears within 6 months if for example ended up in the ocean (depending on water temperature, turbulence, salinity etc.) You can just walk with the bag in the rain because it only dissolves if it is permanently in the water or submerged. The composition of polyvinyl alcohol is CH₂-CH-OH and it splits when dissolved in water (H₂O) and carbon (C). Carbon is not a gas and therefore will not enter the air as a greenhouse gas.

Features

- Country of origin: CN
- Shipment date without imprint: 1 Working day(s)
- Statistic number: 42022290

Imprint options

Imprint options	Maximum size in mm	Imprint technique	Max. number of colours	Printing and handling costs codes
on the back in 1 colour	200 x 200	silkscreen print	1	S5 - H2
on the back in more colors	200 x 200	silkscreen print	3	S5 - H2
on the front more colors	200 x 200	silkscreen print	3	S5 - H2
on both front sides in 1 colour	200 x 200	silkscreen print	1	S5 - H2

Packaging

- Sizes export box: 62 x 38 x 40 cm
- Weight export box including volume: 12 kg
- Number in export box: 200 pieces
- Quantity on pallet: 3,200 pieces
- Packaging per item: No
